IT CONSULTING

INTUISYZ IT Consulting services assist you in ensuring that your IT is able to quickly and efficiently adapt to new business requirements, and is delivered in the most cost-effective model to suit the pace of your business growth. We work with you to assess your current IT situation, delivering expert insight and robust recommendations that strengthen your decision-making, in alignment with your business and technology strategies.

IT Strategy Services

Intuisyz provide technology consulting services to organizations and enable them to take the right technology decisions to outperform their competitors.There is a strong relationship between an IT investment decisions and organization's overall strategies and objectives. We understand the challenges and opportunities, and bring an independent view on the existing IT strategy and consulting services to help our customers to achieve high levels of IT efficiency.

Quality Management

Intuisyz provides unique quality management services to improve the performance of your organization with highest quality . In order to keep pace with ongoing change, we are constantly innovating to find newer solutions, that can help our customers to ensure best quality – at minimum business risk and with maximum business impact to their organization. Our Quality management helps our customers to, improve the ability to manage and prevent the defects, reduce rework & cost, improve productivity, sustain quality throughout the project

Management consulting Services

Team Intuisyz is a dedicated team with considerable experience of business and technical operations. Our management services are built based on the specific domain expertise appropriate to requirements of our clients. From requirement gathering to IT infrastructure strategy, we provide a full range of consultancy services and support to solve our customer hassles.We will analyse the existing organizational problems and develop solution for improvement. Intuisyz management services will help you to maximize the return on investments, not just in how it can help the side of your business that produces revenue, but also how it might reduce costs over the long term. Our goal is to manage your IT projects efficiently also provide proper Change management and Quality Control.

Requirement & Contracting for IT Services

Businesses often struggle to communicate effectively with technolgy vendors. Lack of clarity in requirements always leads to increased costs and low quality. We can help you translate your requirement in a purely business language to a language which a typical technology person with least business knowlege will understand. This is the first step towards geting what you actually want.
When engaging with technolgy vendors, if you need help to draw up contracts that will ensure maximum legal protection for your IT investments. We ensure that industry standard processes are followed at every stage of system development and help you track the projects effortlessly. This will help you initiate corrective action at the earliest considerably reducing risk of meeting your schedule, cost or quality goals.

Process

Initiation - 15 Minutes

Successful businesses understand that their businesses need to keep evolving to remain successful. The biggest changes in business environment today have something to do with Information technology. We request one of the business leaders to meet with our consultants at your own office. During this meeting, we will be able to find out whether your business will benefit from a strategic change in your Information Technology use.
Sometimes, you may not have anything to worry. Your IT Systems may be just right for your business. Do you have a plan to ensure that you will continue to get the same systems going forward at an affordable cost ? Often IT costs escalate with time due to increasing licensing costs .

Are you prepared for the rapid changes in the Information Technology ?

Detailed Business Review - 1 Week

During this stage, INTUISYZ performs an in depth analysis of your business model to suggest to you your strengths and weaknesses from an IT Stand point. Businesses need to consolidate their strengths and work on their weaknesses

We analyze various areas of your business to see whether there is any area you can improve return on Investment

Some of the areas we cover are :

Branding , Websites, Social Media, Marketing, Advertising	Management Reporting
Customer Relations / Sales	Project Management
Accounting, Cash Flow, Tax Reporting	IT Security / Training
HR , Payroll, Performance Management	Logistics

Detailed IT Systems Review – 2 Weeks

Very often, businesses do not use their existing software systems effectively. Sometimes, it is possible to improve productivity by just using your existing software in the best possible way.
When a system is not meeting some of your needs, it is possible to extend that software rather than buy something entirely new.
At the end of this review, we will be able to help you use your existing systems in the best possible way and provide you pointers as to how you can optimize your IT presence.

Strategy Document – 1 Week

This is a summary document which contains a roadmap of steps that you can take to get the best returns on your IT investment.

Strategy Execution

We help you execute the strategy and report to you the progress on a regular basis. You can consider us as Your OWN IT Team that helps monitors your IT vendors for you.

Our Clients & Projects

With adequate technical expertise, we can serve your requirements on diverse domains using responsive technologies.

Leadership
& Qualities

We can help you get value out of your IT investments. At INTUISYZ, we can work with your software and Hardware vendors to deliver solutions that make sense to you in long term. When you need systems that are not available in the market, we can help you build these systems at the lowest possible cost without compromising a bit on quality. We can help you predict future technology advancements, and adapt your business accordingly.
