They will come

E-Commerce Application Development Service

We have many valuable platforms to ensure perfect system for profitable online business. The following image will reveal our insight in developing ecommerce applications for various business.

Product category

Among the abundance of products we are categorizing them in such a way to choose the right product for the specific customer.
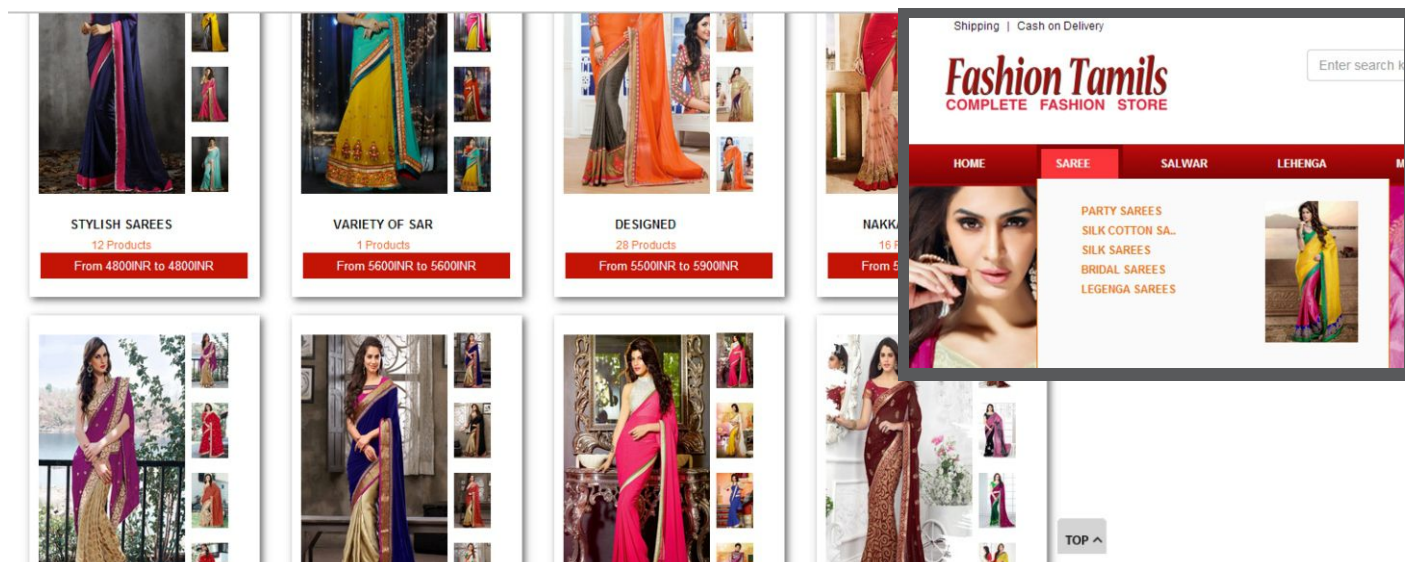

Product search.

Product search from different angles can be done as per the interest of the customer. It may be price wise, color wise, quality wise of different category.

Shopping cart

Our unique approach in building shopping carts with special peculiarities will be an additional attraction to the customers.

Admin panel

We provide the clients the provision for various activities like include/exclude products in website, statement of orders in hands, advertising new products etc in the admin panel.

Registration / sign in

Interested customers can also register their personal details with the clients. This will help the clients to inform the credit worthy customers the new trend in business such as arrival of products, discount offers etc
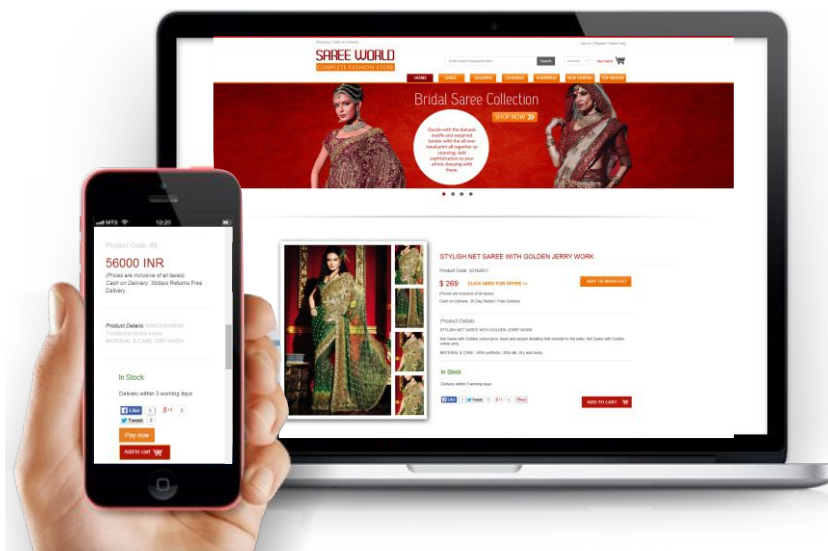

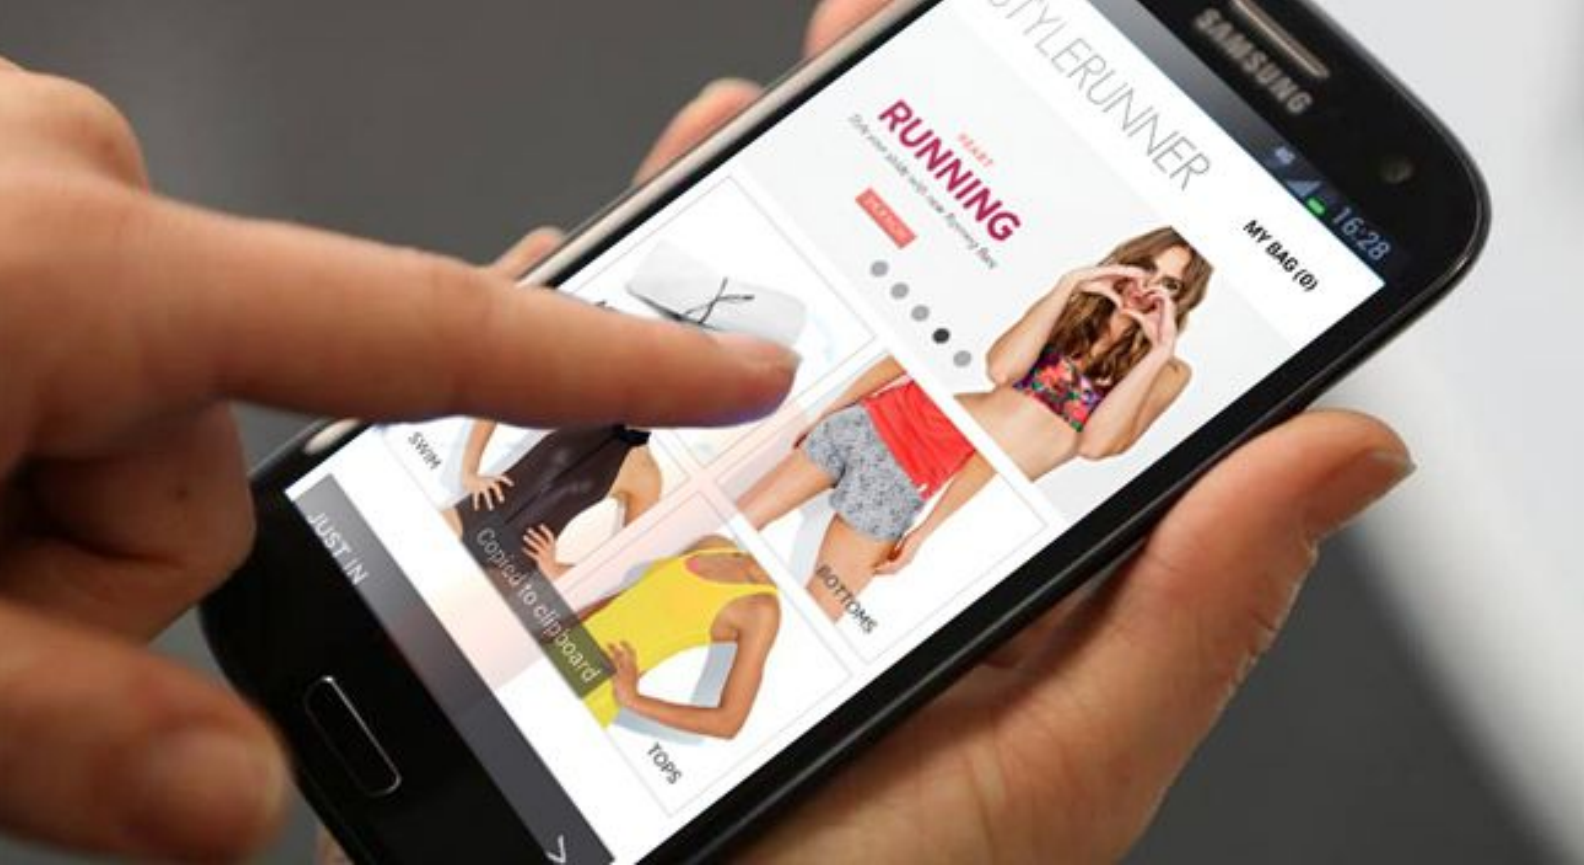

Conquer the mobile commerce

INTUISYZ delivers a consistent web browsing experience across all devices and platforms. The Mobile Web feature allows you to adapt your online store for devices such as smart phones and tablets.

Leverage multi-channel touch points

Reaching new customers and engaging with existing ones is vital for the success of your online business. INTUISYZ helps you address the community around your brands and products effectively
